Our Functions

- To provide a platform for information on agribusiness and agro-industry development, market information, economic intelligence and investment
- To facilitate the provision of knowledge, skills, relevant experiences, best practices and formal training
- To lay a platform for strategic partnerships among the stakeholders and also with other relevant partners such as researchers, finance actors, development partners and institutions of higher learning.
- To harness available financial resources to aid PanAAC’s stakeholders.

Our Activities

PanAAC as a platform for information, knowledge, strategic partnership and financial remediation for stakeholders in agribusiness and agro-industry has initiated programs aimed at strengthening linkages between producers of technology, agricultural training institutions and agribusiness in order to make agricultural graduates owners of business, employers and skilled and marketable professionals. PanAAC offers a platform for reliable information on markets and value chains based on reliable reports, market analysis and relevant experiences. The consortium collects and collates data, processes them into valuable business intelligence for it stakeholders.

Our Approach

PanAAC’s approach towards carrying out its mandate is hinged on strategic partnerships and impact network with all stakeholders in agribusiness and agro-industry. The consortium recognizes that as a network it brings together a large array of stakeholders with different interests and expectations and therefore it will strive to meet the needs and expectations of its constituents by developing relevant activities to be implemented by a well-established secretariat.

PanAAC also recognizes the need to promote investment in Africa, hence is establishing a platform for business to business interaction, business match making with other investors in Europe, America, Middle East and Asia. The Consortium continues to host sub regional dialogues and consultation on specific issues that impact on its constituents. These dialogues seek to address the key issues of productivity, investment, markets and trade policy.
